Career Objective

Full Stack Java Developer with hands-on experience building and deploying scalable web applications using Spring Boot, REST APIs, Spring Security, and React. Developed enterprise-grade projects including a distributed key-value store with microservices architecture and a secured banking application with role-based access control. Backed by internship experience in Java development and AI/ML, seeking to contribute to digital transformation and custom software development initiatives.

Skills

- **Languages:** ,C,C++Java,Python, SQL, JavaScript, HTML5, CSS3
- **Backend:** Spring Boot, Spring Security, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Maven
- **Frontend:** React.js, Thymeleaf, Bootstrap, Axios
- **Databases & Cache:** MySQL, PostgreSQL, MongoDB, Redis
- **DevOps & Tools:** Docker, Docker Compose, Git, GitHub, Postman, IntelliJ IDEA
- **Core Concepts:** OOP, Data Structures, MVC Architecture, SOLID Principles, REST Architecture, Authentication & Authorization, Distributed Systems, Event-Driven Architecture

Education

- **B.Tech – Electronics and Communication Engineering** **CGPA: 7.75**
Vignan's Institute of Information Technology, Visakhapatnam 2022–2026
- **Intermediate – MPC** **Marks: 900/1000**
Sri Chaitanya Junior College 2020–2022

Projects

Distributed Key-Value Store

GitHub

- **Designed and developed** a distributed key-value store inspired by Redis and DynamoDB using **Spring Boot** microservices with API Gateway, Node Service, Replication Service, and Metrics Service.
- **Implemented event-driven data replication** across multiple nodes using **Apache Kafka** ensuring fault tolerance, high availability, and multi-node cluster synchronization.
- **Integrated Redis** for read/write-through caching and **PostgreSQL** for durable persistence; containerized with Docker Compose and built a React dashboard for cluster & replication monitoring.
- **Tech Stack:** Java, Spring Boot, Kafka, Redis, PostgreSQL, Docker, React

Online Banking Web Application

Live | GitHub

- Built a full-stack banking app using Spring Boot 3, Thymeleaf, MySQL with fund transfer, deposit & withdrawal features.
- Secured with Spring Security implementing login, session management, role-based access control for admin & user roles.
- **Tech Stack:** Java, Spring Boot, Spring Security, MySQL, Thymeleaf, Docker

Internship

OctaNet Services Pvt. Ltd. – Full Stack Java Developer Intern (Remote)

Feb 2026 – Apr 2026

- Developed dynamic web applications using Java, Spring MVC, HTML5, CSS3, JavaScript, and Bootstrap; built and integrated RESTful APIs with full CRUD support.
- Applied OOP, SOLID principles, and Git version control across real-world projects; gained exposure to CI/CD pipelines for build and test automation in an Agile environment.

Crane's Varsity – Data Science & AI/ML Intern (Remote)

Jun 2025 – Jul 2025

- Performed data cleaning, analysis, and visualization on real-world datasets using Python and Pandas.
- Trained classification and regression models for healthcare outcome prediction; evaluated performance using accuracy metrics and derived actionable business insights.

Certifications

- **Solutions Architecture Virtual Experience** – Forage (AWS)
- **Object Oriented Programming** – TUF (Take U Forward)
- **Problem Solving Through Programming in C** – NPTEL, IIT Kharagpur

Achievements

- **2nd Prize – Circuitrix** – VISTA 2025, Vignan's Institute of Information Technology
- **Paper Presentation** – ICRAE Conference (Under Review)
- **Google Hackathon** – Built a working prototype in a team-based hackathon at GITAM University
- **DSA** – Solved 100+ problems across arrays, strings, and recursion on TUF sheet
